CAR SHOW

Cruise nights are a popular local attraction. Advertise the car show, and have voting and prizes. There could be special awards for "oldest car to attend", "most 'Ace' car", etc.

CHARITY CAR WASH

Organize a charity car wash with proceeds going to a local charity. Make it a goal to have 100 cars washed!

Many Ace stores partner with local animal shelters or rescue groups to host adoption events. Even if attendees do not adopt, they can always pet a furry friend or help by donating.

FOOD TRUCK

Partner with local food trucks to give attendees more choices for food and beverages. Make sure there is a tent area or ample seating for people to hang out.

BIKE/PET PARADE

With help of local authorities, organize a pet or bike parade as a fun way to get the community involved. Plan a circular route that begins and ends in your Ace parking lot.

TOUCH A TRUCK

Partner with local Police Department and Fire Department to have squad cars and firetrucks in the parking lot that attendees can experience up close.

CMN FUNDRAISER

Partner with your local Children's Miracle Network Hospital with a fundraising event on the day of the event. It could be a change round up, or inviting kids or representatives to participate in the event.

¾ tsp kosher salt

½ tsp freshly ground black pepper

1 large egg, beaten

⅓ cup panko breadcrumbs

1/3 cup Loud Mouth™ Kaa-Blamo! BBQ sauce (Ace SKU# 8093066)

1 tsp olive oil

SERVES: 4 | COOK TIME: 10-15 MINUTES

INGREDIENTS:

4 ea 6 oz. burger patties (80/20 lean to fat ratio)

5. If adding cheese, place a slice on each patty after flipping and cover with a melting dome to help the cheese melt.
6. While the patties cook, add more Bacon Up to the griddle and toast the buns until golden brown.
7. Before removing burgers, drizzle with Boom Shaka Laka sauce.
8. Assemble the burgers with your chosen toppings and condiments.

Food Safety and Other Helpful Information

How to Serve Safe Food and Comply with Local Health Department Regulations

Keeping the cooking and sampling area impeccably clean is crucial to serving safe food and ensuring customers trust in our demo serving. It also helps with compliance with local health department rules and regulations. Make sure to keep your hands and uniform clean, as well as practice proper handwashing and safe food storage and holding. Follow these additional guidelines to keep you and your customers safe during this event:

Prepping for Your Event

Partner with your local health department to create a health plan for demos. Once they see that you have this well planned, they will be there to support you in your demo endeavors.

Plan your demos for the year and submit them all to the health department at once with your sanitation plan, layout and other required documents.

Understand Your Event Plan

What food are you sampling?

- Nonperishable – crackers, nuts, etc.
- Low Risk – Fully cooked foods or heat-and-serve foods
- Medium Risk – Partially cooked foods; some raw ingredients
- High Risk – All raw ingredients and raw prep

Where was the food purchased?

What kind of storage/prep is required?

- Food storage before demo
- Prep before demo
- Storage during demo

Things to Have on the Day Of:

- Temperature log for hot and cold temperature tracking
- Handwashing station – see example of layout on page 4
- When possible, use disposable serving utensils
- Proper use of gloves
- Proper food serving techniques
- Proper food handling steps
- Hand sanitizer out for customers and associates (food grade and food surface contact). You can buy pre-mixed sanitizer.
- Fire extinguisher

Food and Safety Information (Continued)

Things to Remember:

- Not all health departments require permits; check with your local area to see what is required
- Once permitted, frame and display the permit for your customers to see
- Even though a locale may not require a permit for a demo, you should still maintain safe food handling and serving procedures
- Check with local health department for food handler's classes; having your ambassador take a class may not be required but is always a good idea
- Some food handler's classes are available online
- Once they have passed the class, frame and display the food handler's card at the demo
- Planning your events for the year is a good way to get your local health department involved and show them your plan for doing demos

Note:

- If you can't serve samples because of health department concerns, you can still demo your grills without having to cook. Turn on the Traeger to smoke and show off; turn on the Weber; or fire up the Big Green Egg.
- Keep all grills below 250 degrees F to enhance the smoking of the grills. Always be sure to place signs that state "CAUTION: HOT GRILL." Getting the senses going with smoke is the start of the conversation around grilling.

Another way to showcase your grills is to cook lunch for your associates. You don't need to sample food to sell grills; smoke will create the buzz and curiosity.

Acceptable Handwashing Station for Temporary Food Vendors

Proper handwashing is critical to preventing foodborne illness. Hands must be washed before starting work, after handling raw meat, after using the restroom and any other time hands become soiled. The handwashing station must be set up prior to beginning food preparation or service, and should be located where it's easily accessible and convenient for all temporary food workers.

Setup

Required Items:

- A five-gallon or larger insulated container filled with warm water (100°F–120°F) for handwashing delivered through a spigot or spout that is continuously flowing. (No push-button spigots.)
- A container for wastewater retention (i.e., five-gallon bucket), which must be disposed of into an approved sewer or wastewater system once full.
- Hand soap and paper towels (sanitizers DO NOT replace handwashing).

Discussion Points

DEMO – Use your premade Cabot Prep Demo board as a prop when discussing our Prep Products. Start by showing the un-prepped portion of the board. Once you've talked about the Cleaner, reveal that section of the board, and so on.

- **Wood Cleaner** is specially formulated to remove mildew stains, mold stains, algae stains, dirt and other foreign matter from all painted, stained, unfinished or weathered wood surfaces. Use for routine cleaning and for properly preparing all surfaces prior to staining or painting.
- **Wood Cleaner** is also recommended for use on new wood before staining. Even though the wood may look clean, there is likely dirt and residue from shipment and the warehouse.
- **Wood Brightener** is formulated to remove unsightly discoloration of wood caused by tannin bleed in extractive wood types such as cedar and redwood. It also removes metal rust stains. This product can be used on all painted, stained and unfinished wood surfaces. When used on weathered wood, it brings back the rich, "new wood" look.
- **Wood Stripper** is specially formulated to remove oil-based finishes from all wood surfaces such as cedar, redwood, pine, cypress, fir and pressure pressure-treated wood. Recommend this to customers who need to remove a peeling oil-based finish. Requires neutralization with Cabot Problem-Solver Wood Brightener.
